**17** Countries Live & in Progress

**8M** Consultations & AI interactions

Babylon is a leading global, digital-first value-based care company. We're shifting the focus of healthcare from sick to preventative care, resulting in better health and reduced costs. That's why we're combining cutting edge AI-powered technology with human medical expertise to create all-in-one healthcare - right from your device, at no extra cost. Babylon is so much more than just a doctor on your phone. We believe it's a better model of healthcare for everyone.

\*Babylon US data (March 2020 to December 2020).

\*\*Babylon US data (2020). Only includes GM appointments.

\*\*\*Babylon study completed in 2020 using NHS data (2020).

## Closing the health service gap in **Rwanda**

Our service in Rwanda is called Babyl. It gives Rwandans one of the most progressive solutions to healthcare in the developing world. By partnering with the Bill & Melinda Gates Foundation and the Government of Rwanda, we've built digital services to suit the needs of Rwandan people. Currently, Babyl has 2 million registered users, with the doctors and nurses completing over 3,000 consultations every day.
